

AGROS dissemination

We try to spread the word as much as possible about the AGROS project. We are keen to present the project concept, products, especially the training course.

On May 12 Kaunas STP team had a study visit at Kauno technikos profesinio mokymo centras (Kaunas Technical Vocational Training Center) during which the AGROS project was also presented. The Center applies the principles of ecology and sustainable development in its activities. Hopefully, the concept of AGROS project will inspire them further-at least a bit.

Kaunas STP representative Vaiva Kalmelytė gives a presentation about project AGROS
