AGROS at 'Coffee with Kauno MTP'

Kaunas STP, the member of project AGROS consortium from Lithuania, tries to keep up with today's issues and integrates the global Sustainable Development Goals into its daily activities. It strives to spread such ideas among citizens and to contribute to the education of responsible future leaders. The institution follows the guidelines and carries out activities focused on global goals.

On the 10 of June Kaunas STP held an event called "Coffee with Kauno MTP". It is a regular event which gathers members of Park's community. This time the event was dedicated to present and discuss the topics related to sustainability and activities to promote this. Several EU funded project were presented including AGROS. It has been emphasized that project focuses on the green roof trend as one of the means to increase community involvement and awareness of current environmental issues. The presentation was followed by the introduction to AGROS course: a practical solution in the form of a concentrated distance learning course, which will introduce to the concepts of sustainable behaviour and the basic principles of green roof design.
